Chinese girl runs marathon every day

Perhaps you think a few hours of sport at school is enough exercise, but for the Chinese girl Huimin Zhang it is not. She is running a marathon every day. Huimin started 15 days ago. The eight-year-old girl, from Tianjin in China, has been asked by her dad to run 33 miles a day. So she can train for the Olympics in Peking in 2016. (Don't forget to watch her on TV in 2016!)

She began her massive challenge on Thursday, with her dad Jianmin Zhang riding beside her on his bike. Her mother and some of her relatives are worried so much running is bad for Huimin's

health.

But Mr. Zhang who is a sports teacher at Peking University says he's not forcing Huimin to run, and that she can stop whenever she likes.

"I believe to be successful you have to practice from an early age," he said.

Huimin loves running. She started at the age of four. She was always the best runner of her school and dreams of winning the gold medal in 2016.

Her fourteen year old brother Wang hates sports. He is a computer expert and loves surfing the internet.

In Britain, most running clubs wouldn't accept members under the age of 11 and you can't enter most marathons unless you're 18. (231 words)
